**Within the cultural program of the AVANTGUARDA cycle, we have the opportunity to participate in the debate group formed by Vicente Molina, architect and specialist in artificial intelligence, Beatriz Borque, architect and landscape designer and Aixa del Rey from Flexo Arquitectura, with the theme of experimentalism 'where are we going?'. The event will be moderated by Anna Castellà.**

We will see the challenges of the future that contemporary cities face, if from architecture and urban planning we can imagine optimistic scenarios escaping from this dystopian vision with a lack of resources such as water and a polluted atmosphere.

Vicente Molina, architect of mtres studio in Madrid, is director of training courses on architecture and how to work with artificial intelligence.

Beatriz Borque, architect and landscape designer for the Escola Técnica Superior d'Arquitectura de Barcelona (ETSAB) and the École National Supérieure de Paysage de Versailles (ENSP), is currently working on several architecture and landscaping projects. In addition to his professional practice in the studio, he also works in the theoretical and academic field.

Flexoarquitectura is a studio founded in 2002 by Tomeu Ramis, Aixa del Rey and Bárbara Vich, which since 2017 has been directed by Tomeu Ramis and Aixa del Rey. A study based in Barcelona interested in the capacity of any project to make sense within a particular cultural context utilising the resources ? both conceptual and narrative- and the constrictions - technical, economical and material- as the opportunities from which to build the project?s strategies.

**At the end of the debate there will be a dinner-colloquium** with the speakers at the Barhaus restaurant. You can sign up by sending an email to [comunicacio.tar@coac.net](mailto:comunicacio.tar@coac.net).  
**Dinner price €22.**

The AVANTGUARDA cycle is divided into four main sections: environmentalism, experimentalism, communicationism and academicism. The format of these four sections and on different days will be that of a conference [C], a debate group [G] and a master class [M] per month.

**Within the cultural programming of the AVANTGUARDA cycle, we have the opportunity to listen to the architecture studio Takk, where Mireia Luzàrraga will offer us a conference on the subject of experimentalism, with the title 'Architecture and co-existence'. The event is presented by Anna Castellà d'Arjub.**

Takk is an architecture and design studio based in Barcelona. Founded by Mireia Luzàrraga and Alejandro Muiño, their projects investigate how architecture can catalyze the development of more democratic lives by incorporating feminist thought, ecology and politics into spatial practices.

His work has received recognitions such as the COAM award, the 'Temps de les Arts' award and the FAD award.

His works are developed both in the public and in the private sphere. Among Takk's clients are FRAC-Centre Val de Loire, IVAM (Instituto Valenciano de Arte Moderno), Barcelona City Council, FAD (Foment de les Arts i el Disseny), FITUR (Tourism Fair) or CA2M (Centro de Arte 2 de Mayo), and for international brands such as Vitra, Swatch, Hermès or Moncler.

**At the end of the conference there will be a dinner-colloquium** with the speaker at the Barhaus restaurant. You can sign up by sending an email to [comunicacio.tar@coac.net](mailto:comunicacio.tar@coac.net).

**Within the cultural programming of the AVANTGUARDA cycle, we have the opportunity to listen to the architectural cooperative Arqbag, where Bernat Colomé will offer us a conference on the theme of environmentalism, with the title 'Subject / Matter / Air'. The event is presented by Anna Castellà from Arjub.**

**Arbag** are an architecture cooperative that promotes new models of relationships between people, habitability and territory. They understand architecture as the transversal management of energy, environmental, economic and social resources. We notice and value the process and not just the result.

They apply a scientific method of work to all types of projects they develop. The purpose of this methodology is to detect indicators, collect data, generate content, parameterize and socialize the objectives, in order to propose strategies based on an objective, transversal and collective vision.

They understand sustainability from an affordable and accessible condition. They are committed to approaching, participating, sharing knowledge and empowering users, building tools for decision-making and collective learning.

**At the end of the conference there will be a dinner-colloquium with the speaker at the Barhaus restaurant.** You can sign up by sending an email to [comunicacio.tar@coac.net](mailto:comunicacio.tar@coac.net).

**Re-Inhabit contexts** encompasses the exercise of sensitivity, rigor and common sense of the architecture that we are interested in exploring.

We understand the context as the order or specific arrangement of those historical, cultural, and material elements that are interwoven with the way of being, of living, of coexisting, of building. This order or specific arrangement builds the common thread from which each of our architectural interventions is born.

In this talk we will focus on 4 projects that work on cultural heritage in different contexts and that have the spirit of recovering it in order to enrich the urban and collective life of different cities. Hence the search to Re-inhabit contexts.

**Mendoza Partida** is an international architecture firm based in Barcelona, ??the result of the symbiosis and connection between Héctor Mendoza and Mara Partida. Two professionals whose unique sensitivity to understand and interpret multiple contexts and situations, together with a constant search for new ways of doing things, support their projects. A studio whose area of ??activity is mainly framed in the design of cultural facilities and housing, areas in which its solutions, in addition to achieving perfect coordination, provide special well-being.

Mendoza Partida, through experimentation, research and innovative solutions based on common sense and congruence, provides its architecture with a precise balance between geometry, matter and emotion.
