**Did you know edification is responsible for 40% of energy consumption in Europe, and 36% of CO2 emissions?**

Sabies que l'edificació és responsable del 40% del consum d'energia a Europa, i del 36% de les emissions de CO<sub>2</sub>? It is in front of this situation that architects have the responsibility to lead the decarbonisation of the architectural sector and to act against the actual climate crisis.

To meet the goal of **making Europe a carbon neutral continent by 2050**, we must change the way we design and build. The COAC accompanies you and offer the necessary resources to face this change.

To keep you up-to-date, save the next **November 21st** in your agendas, as we will celebrate

the second '**Decarbonizing Architecture**' edition.

The main changes the profession has to make for the next years will be explained, as well as some international cases of success. We will also approach. We will also address topical regulatory issues, such as the new Energy Efficiency Directive for Buildings and the European Taxonomy, and we will present essential tools to improve our professional practice, such as the portfolio of decarbonized materials or the CO2 measurement tool that the COAC will put into operation this year.

The **World Congress of Architecture UIA-Barcelona 2026** is on the horizon and this second edition of #DecarbonizingArchitecture is a key milestone in the construction of the paradigm shift that we must promote professionally and globally.

**Do you want to relive the first edition of #DecarbonizingArchitecture? Find the videos!**  
More than 300 architecture professionals already participated in the first edition, with 14 high-quality speakers and 11 national and international authorities. If you are interested in recovering them, you can find the videos for all the sessions:

Amb la mirada posada en la celebració del **Congrés Mundial d'Arquitectura de la UIA a Barcelona l'any 2026**, aquesta 2a edició de #DescarbonitzantArquitectura és una fita clau en la construcció del canvi de paradigma que professionalment i globalment hem d'impulsar.
